DETAILED ACTION

This office action is in response to the amendment filed 7/15/05. A new ground of rejection is introduced as necessitated by amendment.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 25 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 25 is indefinite because there is no antecedent basis for the limitation "the second frequency".

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 24 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee et al (US 2002/0004376) (previously cited).

As to claim 24, Lee et al. discloses in figure 5 a circuit, comprising: a differential input stage (M51, M52) having first and second output nodes that respectively have first and second capacitances (capacitances between the nodes and VDD), and a filter (L1, L2, C1, C2, M57) coupled to the first and second output nodes and comprising a parallel tank circuit having an

Art Unit: 2816

element (L1, L2) that forms a parallel resonant tank circuit with first and second capacitances (at frequency that the parasitic capacitance of M56 is shorted).

As to claim 25, figure 6 shows that the filter is operable as a parallel resonant circuit at the first frequency (frequency that the parasitic capacitance of M56 is shorted) and is operable as a series resonant circuit at the second frequency (frequency that the parasitic capacitance of M56 is not shorted).

Allowable Subject Matter

5. Claims 1-23 and 26-29 are allowed.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
